

JAROMANSEN DAMANIK

Hi! My name is Jaromansen Damanik, I'm final year student at Gadjah Mada University where I am majoring in Agricultural and Biosystem Engineering. I'm interest in smart farming and environmental issue in agriculture. I have done a lot of research related to developing smart farming and erosion control in a watershed, my focus is to develop a technology in agriculture for supporting integrated pest management used sound frequency that can afford to help farmer to solve pest's problem in agriculture. When I'm not busy, I am enjoying play my guitar, playing guitar makes me calm and removes my boredom.

ANDI SAPUTRA TELAUMBANUA

My name is Andi Telaumbanua. I am a final year undergraduate student majoring in agricultural and biosystem engineering with a major focus on postharvest engineering and food processing at Gadjah Mada University. I am the type of person who likes to observe and plan things. Also I am interested in the development of environmentally friendly agriculture. Last semester, I and my team won 1st place in the Agritech exhibition 2020 competition at Hasanuddin University with a microcomputer-based bioacoustic monitoring system paper integrated with the cloud for integrated pest control in agricultural production.

Hi there! My name is Patrick Gani and I am a Chief executive officer of biamon now. I am a creative and hardworking, and I enjoy using my skills to contribute to the exciting technological advances that happen every day. Currently attending Gadjah Mada University with a Bachelor's Degree in Agricultural engineering and biosystem. While in university, I earned gold medal for my research paper for biamon in 6th Southeast Asian Agricultural Engineering Paper Competition in 2020, i'm also tanoto scholarship Awardee for my exemplary academic performance and leadership skills.
